

Alan James & Co

Chartered Accountants and
Registered Auditors

Client Testimonial

Able Data is a leading Voice and Data cabling infrastructure provider, specialising in the design, installation and maintenance of high quality structured cabling solutions. Formed in 1988, Able Data has grown from a small maintenance operation into one of the leading network solutions provider in Europe.

"Alan James & Co were newly appointed to audit our accounts this year.

The first change we noticed from previous audits is that the staff conducting the audit, were not only exceptionally thorough, but qualified to discuss business practices and processes during the audit. Further, at the end of the audit we received a comprehensive review of our business, highlighting key points and weaknesses. Not only did the whole process highlight important financial points that had gone for many years unspotted, but we now have a whole list of useful management points to review, many of which we will definitely feed into our procedures.

In summary, I thoroughly recommend Alan James & Co to any company who need approachable but very competent accountants."

Clive Tuckwell, Managing Director. October 2007.
